

WHAT IS A WATERSHED?

A watershed is an area of land that drains into a lake or river.

Stand at the shore of Swartswood Lake and look around you to the tops of the mountains that surround the lake. The approximately twelve thousand acres that you see make up Swartswood's Watershed. All precipitation falling in this area, with the exception of that absorbed by vegetation will make its way into the lakes, or into the streams which feed the two lakes. This can occur as simple run-off after a storm, or by means of groundwater, which enters the lakes via springs.

Unfortunately this drainage brings not only water, but other material and pollutants as well. These might include dissolved fertilizers, soil particles (silt), pesticides, herbicides and hydrocarbon oils.

The primary goal of the Swartswood Lakes and Watershed Association is to preserve the water quality of the Lakes, streams, wetlands and its Watershed, through education, management grants and the promotion of environmentally sound practices by all who use the lakes.

Swartswood Lakes contribute to the quality of life for everyone in the area. What their future holds depends on how they are used by all of us. Won't you join with your friends and neighbors to help protect and preserve this natural area so that it may continue to be enjoyed by future generations?

MEMBERSHIP MEETINGS

The members meet twice per year, usually in May and in September.

TRUSTEE'S MEETINGS

The officers and trustees meetings (open to all members) are scheduled about 8-10 times per year.

SPECIAL EVENTS

Events such as picnics, special meetings, volunteer training or seminars are often scheduled in the summer.

NEWSLETTER

A newsletter "Shore to Shore News" and a number of related mailings are made throughout the year to the members.

COMMITTEES

Volunteers are needed for committees concerned with education, monitoring, fund raising, etc.

2012 TRUSTEES

Jim Stark, President

Paul Adamski, Vice-President

Larry Condit, Treasurer

Margaret Emmetts, Secretary

Randy Sprague, Technical Advisor

rev. 5/12

Do you enjoy the Swartswood Lakes area?

Would you like a voice in determining the future of the area?

Help us in preserving the quality of the lakes.

We are a nonprofit organization of volunteers who are interested in improving, monitoring and recommending solutions to implement the restoration of water quality of the Swartswood Lakes and the Watershed area

The Association is working for:

The Residents
Property Owners
Renters
Nature Lovers
Conservationists
Campers
Fishermen
Hunters
Swimmers
Boaters
Sailors
You!

HISTORY

The Swartswood Lakes Association was formed in 1992 when a group of concerned citizens banded together to preserve Swartswood Lake. Several years later the organization was expanded to include Little Swartswood Lake and the Watershed of both. In this short time period the Association has built an impressive list of accomplishments:

Limnological Study of the lake. *

Hypolimnetic Aeration system installed
(\$250,000. grant)

Lake Harvesting Project
(\$96,800. grant)

Purchase of Weed Harvester
(\$30,000. grant)

Biological Control for Eurasian milfoil
(\$72,650. grant) ***

Septic System Management
(\$155,875. grant)

Stormwater Management
(\$223,640. grant)

* with Sussex Co Water Quality Mgmt Program

** with Sussex Co. Dept. of Planning

***with Swartswood State Park

These grants all require matching funds. Fortunately these are available through volunteer hours which are considered "in-kind" matching funds. Each year in excess of 2500 such hours are contributed through the efforts of the Paradise Fishing Club, Emmons Lane Association, Swartswood Yacht Club, Little Swartswood Lake, Camp Lou Henry Hoover and Camp Aldersgate. All of whom work in conjunction with SLWA.

Future projects include:

- **Keen's Mill Preservation & Adaptive Reuse**
- **Little Swartswood Lake Biomass Removal study**
- **Swartswood Lake Algae Bloom**
- **Upper Crandon Lake Association Educational Outreach**
- **Lower Crandon Lake Water Quality Study (in conjunction with the Stillwater Environmental Commission)**
- **Control of American Lotus Herbicide treatment of lake as a joint project between residents and The State Park**
